

Macadamia DNA Fingerprinting Service

Precision Tree Breeding Platform

Getting started

1. Register as a user of the Precision Tree Breeding Platform using the QR code below.
2. We will contact you to set up a meeting to discuss your needs and the context in which you are working.
3. Establish which reference samples you will be using and request permission if needed.
4. Sign a service level agreement indicating that you agree to our terms and conditions and acknowledge our current pricing.
5. Make a project booking using the QR code below and receive a quotation.
6. Request a sampling kit using the QR code below, this comes with a field sampling guide with all the information you need to collect samples.
7. Submit the samples for analysis and receive a report, thereafter you will be invoiced.

Costs

- These prices are valid from 1/04/2023 – 31/03/2024. DNA isolation from different tissue types is available, price upon request. Contact Melissa.Reynolds@fabi.up.ac.za

Description	Cost/sample (batches of 96)	Cost/sample (variable number)
1. DNA isolation from leaf tissue	R95.00	R105.00
2. DNA isolation from kernels	NA	R280.00
3. Microsatellite genotyping (one panel of DNA markers)	R210.00	R250.00
4. Overhead	30%
